

## Cyber Liability Insurance

**How confident are you that your computer systems are protected from the ever-growing threat of cybercrime?**

State and Federal privacy laws designed to prevent and deter identity theft are being enacted with increasing frequency. Security breaches range from a misplaced mobile device to a sophisticated cyber attack.

In most instances, the law requires companies to notify potentially affected individuals and take proactive steps to minimize the possibility of identity theft. Even if no identity theft results, compliance with legal mandates can be a significant expense.

Brower can work with you to identify the cyber liability exposure to your business and evaluate the best way to minimize the risk through insurance solutions.

Since 1935, Brower Insurance Agency has provided insurance and employee benefits to the business industry. Independently owned since its inception, Brower employs over 175 insurance professionals and offers a comprehensive line of insurance and financial services including Property & Casualty, Employee Benefits, Human Resources Consulting, Surety Bonding, Retirement Services, and Personal insurance.
